

Electrical - Field Service Engineer- RCG

International company that has several fields of activities: Marine and off shore, power plants and high voltage substations, rail transport, drive and industry

Location: Lebanon

Major: degree in Electrical Engineering, or any related field

Experience: 2-4 years of experience in an engineering or technical role

Major Responsibilities:

- Contribute to the design and development of electrical systems for industrial and infrastructure projects
- Prepare calculations, drawings, and technical documentation in compliance with international and local standards (e.g. IEC, IEEE)
- Participate in on-site commissioning, testing, and inspection of electrical installations
- Perform maintenance tasks, including preventive servicing, system upgrades, fault diagnostics, and repairs
- Coordinate with internal teams and site contractors to ensure timely and compliant execution of project
- Communicate effectively with clients to ensure technical expectations are met
- Maintain accurate records and submit reports in accordance with project and company procedures
- Adhere strictly to health, safety, and environmental standards across all assignments
- Be available for international deployments, including short-notice and off-hours assignments

Additional Requirements:

- The position requires frequent travel, therefore having a Dual Nationality or Multiple Citizenship is a plus
- Practical experience with generator excitation systems, SCADA, electrical drives, PLCs, or substation design
- Familiarity with high voltage testing and safety procedures
