100%

Job Placement

83.34%

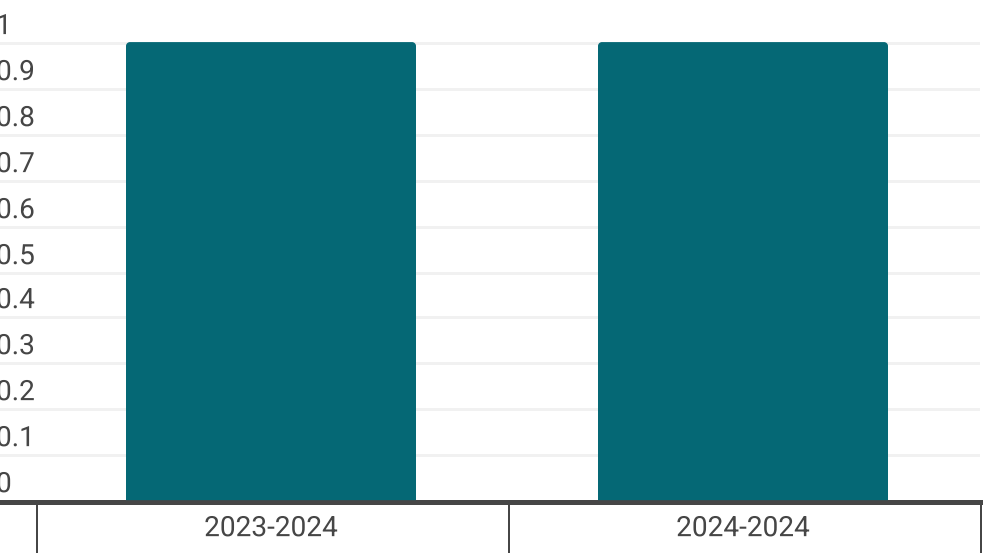

Program completion on-time (avg 2023–2025)

100%

Promoted within 6 months

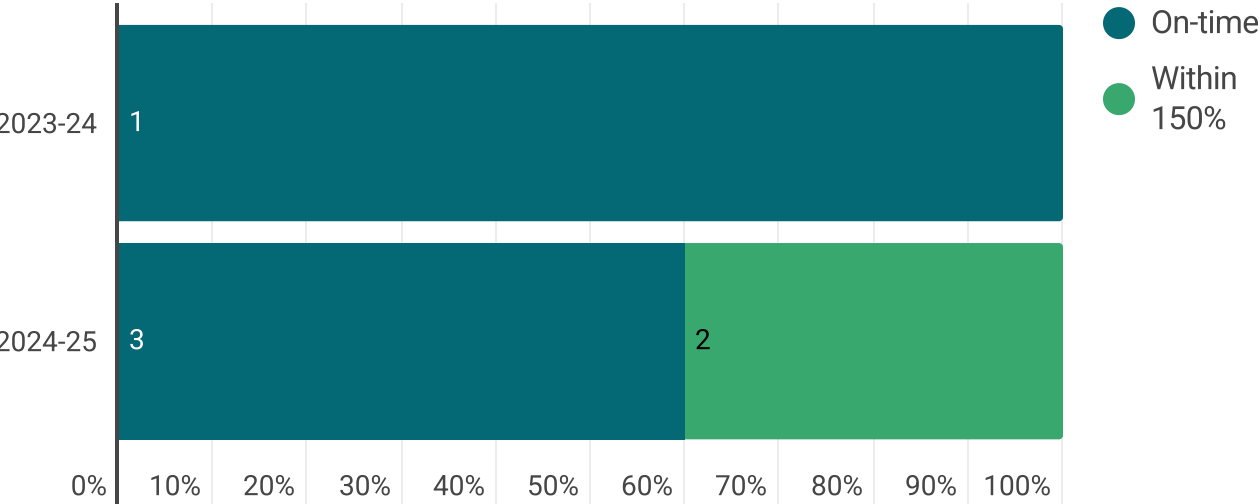

## Job Placement Year to Year

All current graduates have a full-time job before joining the program.

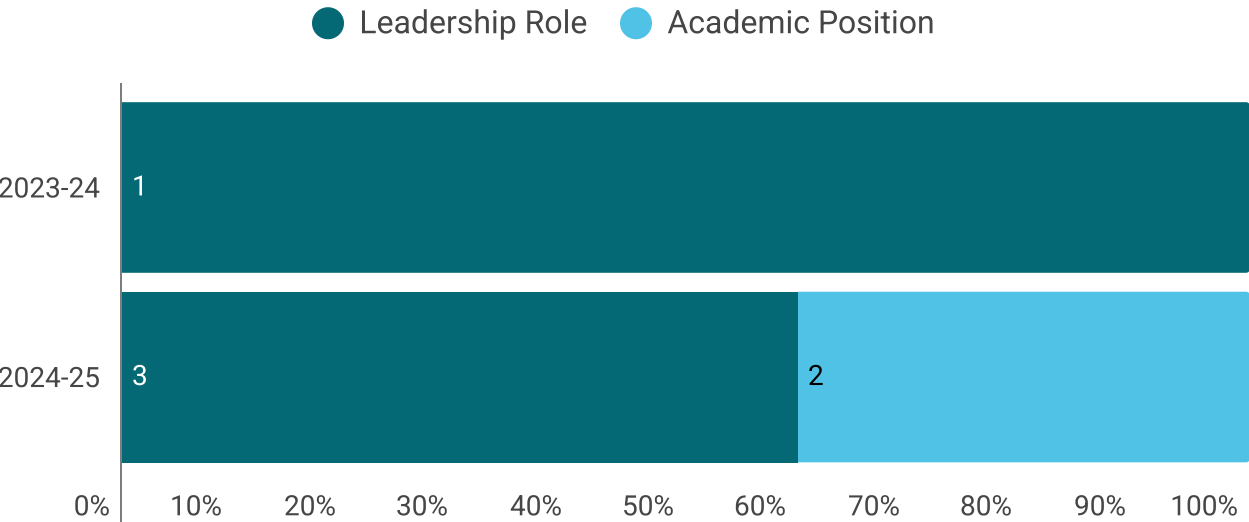

## Program Completion Rate Year to Year

All Graduates in the academic years 2023 to 2025 are part timers, hence the Graduate on Time duration should be between two to four years. **The ELA is that at least 75% of the part time MSN Students complete their degree within three to four years on average. This is met in 2023-24 but not met in 2024-25.**

## Promotion of Graduates

Nearly all graduates secured nursing better roles within one year of graduation. **The ELA is that at least 50 % of the MSN graduates get promoted or are enrolled in higher education within one year of their graduation. This ELA is Met.**

## Program Completion Rate Year to Year by Track

In 2023–24, the only graduate was from Adult Care and completed on time. In 2024–25, two out of four Adult Care graduates finished on time, and one student from Neonatal and Child Care also graduated on time. **This ELA is Met for Neonatal and Child Care and for Adult care in 2023-24 but not in 2024-25.**
